IMPORTANT NOTICE FOR U.S. BROADCASTERS
NEW SUBMISSION DEADLINE
NOVEMBER 14, 2019
399 ELIGIBILITY APPLICATION & 399 REIMBURSEMENT FORM
MISSED DEADLINE = FORFEITED REIMBURSEMENT

With the effects of the U.S. repack reaching low-power television and FM stations, many broadcasters may face unforeseen and complex challenges, including:

- Transmitter/Translator Equipment Requirements
- Filters
- Exciter Changes
- Site Surveys/Installations
- Antenna Changes
- Filing FCC Documents for Reimbursement

With nearly 100 years of experience in broadcast equipment manufacturing, servicing and support, GatesAir continues to be the premier choice of stations affected by the spectrum repack.

Our dedicated and experienced staff will apply their expertise to help you understand the best strategy for your station or network, and our portfolio includes the most comprehensive array of products, services and support available. Our newest low-power transmitter solutions represent the most cost-effective and well-engineered products available, including several innovative features that ensure the utmost in efficiency, bandwidth and reliability.
