Your Repack One-Stop Resource for Low-Power TV Services

Maxiva™ OP Series

with PowerSmart® Plus

High-Efficiency UHF & VHF TV Transmitters

Maxiva OP Series transmitters incorporate innovative world-class engineering, providing unparalleled AC-to-RF efficiency, performance, ease-of-use, and low maintenance costs.

- Compact design
- Wide range of power levels and configurations
- Doherty high-efficiency amplifiers optimized for U.S. broadcasters
- Built-in ASI/RF matrix for automatic exciter switch-over, without the need for an external switchover unit

Maxiva™ Ultra-Compact

Low Power UHF/VHF Transmitter / Transposer / Gap Filler for TV & DAB/DAB+/DMB Applications

- High-efficiency broadband amplifier technology
- Power levels up to 1,000W (pre-filter average power)
- Frequency agile design supporting all U.S. channels
- Extremely compact, space-saving, 1 RU, 2RU, and 3 RU 19" chassis
- Supporting analog and digital standards

Passion for Design.
Peace of Mind.
